EASY CHAIR
design Jun Kamahara
2019 ! 2022

The JK Easy Chair is composed by a thin tubular frame in stainless steel supporting a deep leather seat. The backrest is made of leather strips padded with large cushions, which have been specifically designed to delicately host the person's hips and provide a comfortable support for the back. The comfort granted by this chair is almost surprising considering the highly graphic appearance of the object. All the materials and finishes have been chosen for their capacity to become more beautiful season after season and acquire the famous "glaze of time" (furubi in Japanese).

HAND STITCH UPGRADE | the new version of the armchair employs high-quality materials that are further enhanced by refined hand-crafted workmanship. The backrest is characterised by a generous cushion in fabric and dialogues with the slim leather seat, which is embellished by prominent hand stitching. The leather envelops the metal structure on both sides of the seat and gives rise to a clean and determined design capable of ensuring a high level of comfort.
